Similar remarks apply to the art examinations.

Each application must be accompanied by the district treasury officer's receipt for the fee, and by a certificate of the applicant's having passed the Middle School Examination or some examination accepted by the Commissioner as equivalent or higher.

THE TEACHERS of passed candidates will be eligible for GRANTS under the Grant-in-Aid Code (see Grant-in-Aid Code).

9. In connection with these examinations, SCIENCE TEACHERS, LECTURERS AND DEMONSTRATORS will, as opportunity serves and funds allow, be provided in every Government College, which will be provided also with COLLECTIONS OF APPARATUS AND SPECIMENS, and with LABORATORIES. Encouragement will be given to all recognised colleges and high schools to make similar provision, and to District Boards and Municipalities to establish DEMONSTRATION-WORKSHOPS AND FARMS in connection with the above teacherships and lectureships, so that theoretical instruction may be supplemented by practice.

10. Pending further notification there will be no advanced Higher Examination in the following subjects.—MENSURATION; PLAN-DRAWING FROM SPECIFICATION AND ESTIMATE-MAKING; EARTH-WORK, ROAD-WORK AND RAILWAY-WORK; MACHINE CONSTRUCTION; MECHANICAL DRAWING; STEAM AND THE STEAM-ENGINE; HEAT; LIGHT; METALLURGY; ELECTRICAL INSTRUMENT-MAKING; ELECTRO-METALLURGY; ORGANIC CHEMISTRY; MINERALOGY; PHYSIOGRAPHY; ANIMAL PHYSIOLOGY; GENERAL BIOLOGY; ECONOMIC ENTOMOLOGY; MODELLING; WOOD AND COPPERPLATE ENGRAVING AND ETCHING; PHOTOGRAPHY; and MUSIC. In each of the Industries, numbered in the list below (paragraph 12), from 41 (PRINTING) to 64 (COOKERY), there will, for the present, be only one Higher Examination. In the other subjects, there will be two examinations, one the Preliminary Higher, and the other the Advanced Higher, Examination.

In PURE MATHEMATICS the two Examinations are each divided into two stages, making altogether four examinations, in that subject.

In certain other subjects (see Syllabuses) the Preliminary Higher Examination is divided into TWO STAGES, which may be brought up separately. But no candidate shall be permitted to appear for the second stage until he has passed the first stage, or some examination accepted by the Commissioner as equivalent or higher. In some subjects (see Syllabuses) an option is allowed between two or more sub-divisions of the Syllabus, or of a part thereof.

The Examinations will be so arranged as to allow a diligent candidate of fair capacity to pass the Preliminary Higher Examination in from two to three years after his passing the Middle School Examination, and the Advanced Higher Examination in from two to three years after his passing the Preliminary Examination. Candidates shall not be required to appear in more than a single subject at the same Examination, except in so far as the rules of any institution in which they are studying may provide. Candidates will not, however, be restricted, as yet, to any definite time of preparation; and provided they have passed the Middle School Examination (or some examination accepted by the Commissioner as equivalent or higher), they will be at liberty to come up in any year for the Preliminary Higher Examination, except so far as the rules of the institution in which they are studying preclude. The same restriction applies to students of institutions sending up candidates for the Advanced Higher Examination as the final test of the course in such institutions. But every candidate allowed to present himself for the Advanced Higher Examination in any subject must have passed either the Preliminary Examination in that subject, and in any other subjects declared requisite, or some other examination accepted by the Commissioner as equivalent or higher, or have completed in a technical institution a course of study accepted by the Commissioner as equivalent.

Candidates may, at both the Preliminary and Advanced Higher Examinations, come up in more than one subject, either in the same or in following years, and may, after passing the Advanced Higher Examination, come up for the Preliminary Higher Examination in any subject other than those in which they have passed the advanced Examination.

Candidates who have passed in a lower class in any subject, may come up again to qualify for a higher class, on paying again the full examination fee prescribed in paragraph 7.

11. Students of Science will find it to their advantage to have, before coming up for the Preliminary Higher Examination, that amount of general education which is implied by passing the Matriculation Examination of the Madras or other Indian University, and similarly candidates for the advanced Higher Examinations in science should possess an amount of general education equal to that implied by passing the First Examination in Arts.

12. The separate Subjects in which Examinations will be held are, for the present, those in the following list, which, however, may be added to. Notice of any addition will be published in the *Fort St. George Gazette.*

Note 1.—Till further notice, no examinations will be held in those subjects whose names in the list are enclosed in square brackets [ ].

Note 2.—Advanced examinations will for the present be held in those subjects only whose names in the list are printed in Capitals.

Note 3.—For each subject, except those whose names in the list are enclosed in square brackets, there is published a syllabus of the knowledge required for the examinations, and such syllabuses are on sale at the Madras School Book Society's Depôt, Old College, Nungumbakam, Madras.

N.B.—These syllabuses are subject to revision. Notice of any revision will be published in the *Fort St. George Gazette.*

Both in the written examination and in the *vivâ voce* they shall be such as cannot be answered merely from memory, but shall test the candidate's ability to intelligently apply the principles he has learned. No candidate shall receive marks in any science, art, or industry subject who, in the opinion of the examiners, fails to show such an understanding of its principles as is necessary for a useful practical application thereof.

In such sciences as admit of it the examinations shall have a Practical Side, and arrangements shall be made for testing the candidates, *viva voce*, as well as by written papers. In all subjects, the candidates will be liable to be called upon to produce diagrams similar to those given in the ordinary text-books.

No candidate shall pass in a science, who does not satisfy the examiners in the Practical Side of the subject he elects.

Note.—The examinations will for the present be held only at places where facility exists for the practical and *viva voce* examinations.

14. Lists of the passed candidates shall be published in the *Fort St. George Gazette*, one list in three classes for each subject; candidates obtaining not less than 60 per cent. being ranked in the first class, those obtaining not less than 45 per cent. in the second class, and those obtaining not less than 35 per cent. in the third class. In the case of institutions sending up students for examination in one of the hereinafter named groups of subjects as a test in the preliminary or final course of study in such institutions, a separate group list will be published. For passing in such group the candidate must obtain at least two-fifths of the marks in the principal subject of the group, one-third marks in each of the allied subjects, and one-half on the aggregate. The names of candidates passing will be included also in the separate subject lists.

* In connection with the examination in these Industries there must be brought up Drawing, or Modelling, or both (as the case may require), sufficient for the industry.

In the case of syllabuses in which parts are bracketed, these certificates shall be granted only to candidates who have passed in the whole syllabus. Where the Science or Art is one in which the Preliminary Examination is divided into stages, the Certificate shall not be given until the candidate has passed the second stage: but this rule shall not apply to the Examinations in the several industries. Candidates who have passed a first stage and have accordingly had their names published in the *Fort St. George Gazette*, must on applying for admission to the Examination for the second stage, cite the date and page of the Gazette in which their names appear, and their number in the list of successful candidates.

9. The fixed fees exceeding Rupees 50 on licenses other than special and occasional licenses will be payable in two instalments, one half being payable when the license is issued and the other half at the beginning of the second half-year, viz., 1st October. RESOLUTION—By the Government of India, Department of Finance and Commerce.

Read again—

Resolution in this Department, No. 33, dated the 4th January 1886.

RESOLUTION.—The Governor-General in Council having decided that the District and the Post Office Savings Banks should be amalgamated and that, the Post Office organisation being more widely spread and more convenient for the public than the Treasury system, the District Savings Banks should be closed and their accounts transferred to the Post Office Savings Banks, it was announced in the Resolution of 4th January 1886 that the Government District Savings Banks would be closed with effect from the 1st April 1886 and their accounts transferred to the Post Office Savings Banks. It is now announced that the Savings Banks at District Treasuries which are managed by the Banks of Madras and Bombay will be closed with effect from the 1st June 1886. Any balances in these Savings Banks on the date of closing will be transferred to the Post Office Savings Banks. From the date of receipt of the present orders no new accounts should be opened in any of the Savings Banks at District Treasuries in the Presidency of Madras or Bombay. Any person wishing to open an account in any of those Banks should be directed to apply to a Post Office Savings Bank. Depositors having accounts in those Banks can, in the interval which will elapse before those banks are closed, apply for the transfer of their

accounts to some Post Office Savings Bank under the rules which are now in force for such transfers. The Accountants-General, Madras and Bombay, and the Director-General of the Post Office are authorized to take measures calculated to encourage voluntary transfers of the above nature.

Deputy Master Attendant.

REVENUE NOTIFICATIONS.

TODDY.

Under the power delegated to him by paragraph III of Government Notification No. 76, published on page 188 of the *Fort St. George Gazette* dated 17th March 1886, the Commissioner of Salt and Abkári Revenue hereby declares that the written permission to draw toddy of a grantee of the exclusive privilege of manufacturing toddy shall have, within the area to which the privilege of such grantee extends, the same force and effect as a license from the Collector for that purpose under section 12 of the said Act throughout the Madras Presidency.

H. W. BLISS,
Commissioner of Salt and Abkári Revenue.

Madras, 31st March 1886.

GRASS-CUTTING.

The undersigned hereby give notice that the hoeing up and cutting of grass is prohibited on all esplanades, maidans, sides or slopes of roads, and other public places in Madras, whether in charge of the Municipality or the Collector, and that persons so offending will be prosecuted. Owners of horses are invited to assist by informing their servants of this notice and desiring them to obey it. As the hot weather approaches, all patches of green—large or small—are constantly set upon by grass-cutters, the grass being hacked up by the roots and the spot made unsightly, while the earth so loosened adds to and aggravates the clouds of dust which are always a great nuisance during the hot months.

R. W. BARLOW,
Collector of Madras.

29th March 1886.

J. A. JONES,
Ag. President, Municipal Commission.

Sale of Lands.

Dewan Bahadur R. Ragoonath Row moved the first paragraph of his resolution on the sale of lands—

"No land bordering a street which is less than thirty feet wide may be sold."

Dr. Conran seconded the motion.

Mr. Salem Ramasawmy Mudaliar moved and Mr. P. Ananda Charlu seconded an amendment that it is desirable to adopt the following rules concerning the sale of land:—

1. No objection shall be taken to the maintenance of existing pials, but care must be taken to prevent any addition being made to them, such as roofs, walls, steps, &c.

2. When parties take down their houses to rebuild them, care must be taken to prevent any portion of the new building being built on public land, but the maintenance of the pial in accordance with the terms of rule 1 need not be interfered with.

3. Public land, whether occupied by a house pial or not, situated between the street drains and the boundary of the adjacent private property, may be sold to the owner of such property under the following conditions:—

(i) No greater length shall be sold to the owner of the adjacent private property than the frontage length of such property.

(ii) No public land shall be sold in any street which is less than 20 feet between the drains or 26 feet where there are no side drains.

(iii) Public land may be sold in streets which are 20 feet and upwards in width between drains, provided the land is not, and is not likely to be, required for any public purpose.

(iv) On receipt of an application for the purchase of land bordering a street, the President shall refer the application to the Engineer Vice-President and the Health Officer, and these officers, if they see no objection to the grant of the application, shall return the application within a fortnight with a certificate in the form following:—

We, the Engineer Vice-President and the Health Officer, hereby certify that the sale of the land will not make the locality less sanitary, and that the land to be sold will not be a projection and will not reduce the width of the street below $\frac{20}{26}$ feet.

(v) Upon receipt of this certificate, the President shall refer the papers to any of the Commissioners of the division in which the land is situated and the Commissioner shall forward his opinion within one week from the date of receipt of the papers by him in the following form:—

$\frac{\text{I}}{\text{We}}$ have upon personal inspection satisfied $\frac{\text{myself}}{\text{ourselves}}$ that it is not objectionable to sell the land applied for.

4. When public land has been sold under rule 3, the purchaser will be at liberty to erect thereon any building he pleases, provided he fulfils the requirements of the Municipal Act and Bye-laws.

The consideration of the subject was postponed until next General Meeting.

No. 593.

The 5th February 1886.

In exercise of the powers conferred upon him by Act II of 1886, and of all other powers enabling him in this behalf, the Honorable the President in Council is pleased to make the following rules under the said Act :—

1. The time within which amounts deducted from salary, annuity, pension, or gratuity paid by a local authority under section 8, sub-section (1), of the Act must be paid to the credit of the Government of India is fixed at one week from the date of payment of the salary, pension, annuity, or gratuity. The payment to the credit of the Government shall be made by remitting the amount to the Collector with a statement giving the following particulars for each person from whom the tax has been realised :—

(1) Name.
(2) Period for which the salary has been paid.
(3) Amount of salary paid.
(4) Amount of tax.

2. The return required by section 10 of the Act shall be in Form A hereto appended.

3. Any sums, such as payments to regimental mess or band funds or the like, compulsorily stopped from salary by the orders, or with the approval, of Government, shall be deducted from the salary previous to assessment.

A portion of salary withheld in pursuance of an order of a Court is not a sum compulsorily stopped from salary within the meaning of this rule.

4. A deduction made from the amount of salary, pension, or annuity liable to assessment on account of a payment made to a life insurance company must be supported by the receipt of the insurance company for the payment and a copy thereof. When the deduction is claimed by a servant of the Government, or of a local authority, the officer paying the salary, pension, or annuity will compare the original receipt with the copy, return the original, and attach the copy to the salary, pension or annuity bill if the payee is a Government servant, and to the statement

forwarded with the amount of the tax realised under Rule 1 if the payee is a servant of a local authority.

Where the Collector is satisfied that the original receipt of the insurance company cannot be produced without an amount of delay, expense, or inconvenience which, under the circumstances of the case, would be unreasonable, he may accept such other proof of payment of the premium as he may deem sufficient.

5. The amounts exempted from assessment by section 5, sub-section (1), clause (*g*), of the Act and by Rule 4 above shall not be deducted from income for the purpose of determining whether the income is liable to the tax, or of determining the rate at which the tax shall be levied.

6. The amount to be assessed under section 24, sub-section (1), of the Act on account of a building occupied by the owner thereof shall not in any case exceed 10 per cent. of the aggregate income of the owner derived from all sources. It will not, however, be understood from this that a maximum of 10 per cent. of the aggregate income of the owner is to be considered equivalent to the letting-value of his house. The letting-value will, in all cases, be ascertained on the best data available, in view of the circumstances of the locality in which the house is situated.

7. Salaries, annuities, and pensions paid in April 1886, though on account of March 1886, are liable to the tax.

8. After the close of the year of assessment each Accountant-General or other auditing officer shall submit Return No. I in the form hereto appended to such officer as the Local Government may direct.

9. The certificates referred to in the second column of Part III of Schedule II of the Act shall be in Form B or in Form C hereto appended.

10. Any claim under section 5, sub-section (1), clause (*e*), of the Act to exemption from the levy of the tax on the interest of securities employed solely for religious or public charitable purposes within the meaning of that clause must be supported by a certificate from the Collector, which shall be in Form D hereto appended.

11. In the case of securities, the interest on which is payable by the Government of India, the amount deducted on account of the tax under section 13, sub-section (1), of the Act shall be paid to the credit of the Government on the same day as the payment of the interest is made.

12. In the case of securities, the interest on which is not payable by the Government of India, the amount so deducted shall be paid to the credit of the Government within one week from the date on which interest is paid. The person deducting the amount should pay it to the credit of the Government by remitting the amount to the Collector with a statement showing the following particulars :—

(1) Name of owner.
(2) Description of security.
(3) Number of do.
(4) Date of do.
(5) Amount of do.
(6) Period for which interest is drawn.
(7) Amount of interest.
(8) Amount of tax.

13. Interest on securities belonging to Service Funds shall not be assessed.

14. After the close of the year of assessment each Accountant-General and Comptroller shall submit Return No. II in the form hereto appended to such officer as the Local Government may direct.

15. In calculating the amount of tax payable, the amount due on a fraction of a rupee shall be neglected. Thus the tax to be realised on a monthly salary of Rs. 166-10-8 is Rs. 4-5-2 only.

16. All public servants are forbidden to make public or disclose, except for the purpose of the working of Act II of 1886, any information contained in documents delivered or produced with respect to assessments under Part IV of the said Act, and any public servant committing a breach of this rule shall be deemed to have committed an offence under section 166 of the Indian Penal Code.

17. Power to make further rules is hereby delegated to the several Local Governments.

18. Each Local Government will prescribe forms of registers to be maintained by Collectors and others for the purpose of showing the demand and collections of the tax, the various classes of incomes assessed, and the working of the several provisions of the Act.

19. After the close of the year of assessment each Local Government will submit to the Government of India in the Financial Department a report on the working of the Act.

20. The following returns in the forms hereto appended will be submitted with that report :—

NEW MEMBER.

The Hon'ble Mr. Webster, Chief Secretary to Government, took his seat as an Additional Member of Council.

ACTS ASSENTED TO BY THE GOVERNOR-GENERAL.

His Excellency the President announced the assent of His Excellency the Governor-General to the following Acts:—

No. I of 1886—"The Madras Abkári Act."
No. II of 1886—"The Madras Harbour Trust Act."

MADRAS HARBOUR TRUST ACT II OF 1886 AMENDMENT BILL.

The Hon'ble MR. SULLIVAN, in introducing a Bill to amend Madras Act II of 1886, said:

"YOUR EXCELLENCY,—I very much regret the necessity which obliges me again to bring under the consideration of the Council a measure which has so long been the subject of deliberation and which it was thought had at last been fairly launched. I refer to the Madras Harbour Trust Act, which received the assent of His Excellency the Governor-General on the 20th ultimo, and which has taken its place on the Statute Book as Act II of 1886. The necessity for passing a measure to amend the Act which attained legal vitality so recently is explained in the statement of objects and reasons published with the amending Bill on the 24th instant, so I need only briefly state here that, when Government proceeded to take the necessary steps for bringing Act II of 1886 into operation, it was found that the effect would be to abrogate for a season all constituted authority under which the administration of Harbour revenues could be carried on. In order to constitute the Board, the first step necessary is to bring into operation, by notification, Act II of 1886; but, as matters stand, the existing Harbour Dues Act (Act VI of 1882) would thereby be simultaneously repealed. The provisions of Act II of 1886 are such that an interval must elapse between its being brought into force and the complete formation of the Board; and as Act VI of 1882 disappears from the Statute Book directly its successor comes into being, it follows that during the interval referred to there would actually be no law under which the affairs of the Harbour could be administered. We should be quite off with the old love and only partially on with the new. It is to remedy this defect that the Bill now before the Council has been framed. It is proposed to take power to bring into operation at first only those portions of the new Trust Act which relate to the constitution of the Board. This, while it will admit of the formation of the new Board, will not affect the legal existence of Act VI of 1882, which will continue in force until the remaining portion of the new Act is brought into operation by the issue of a second notification. In ordinary circumstances it would be my duty to move that the Bill now before the Council should be referred to a Select Committee for report, but having regard to the simplicity of the measure, introduced to supply a patent legal defect in the Harbour Trust Act, the principles of which are in no way affected thereby, and keeping in view also the expediency of avoiding further delay in bringing the administration of the Harbour under the control of the Board, the constitution of which is provided for in Act II of 1886, I feel sure I shall have the Council with me in asking His Excellency the President to suspend the standing orders in view to the Bill being considered and passed into law at this sitting."

The Hon'ble MR. BOYSON seconded the motion.

HIS EXCELLENCY THE PRESIDENT directed that the Standing Orders be suspended.

The Hon'ble MR. SULLIVAN then moved that the Bill be taken into consideration and passed into law.

The Hon'ble MR. BOYSON seconded the motion, which—the Bill having been read—was put and carried and the Bill passed by the Council.

RAILWAY PROTECTION BILL.

The Hon'ble COLONEL SHAW-STEWART presented the report of the Select Committee on the Bill to provide for the prevention of injury to lines of railway from the escape or overflow of water from irrigation works situated upon the lands of zemindars or other land-holders. He said:

"YOUR EXCELLENCY,—When this Bill was introduced six months ago, I stated at length the circumstances which had made legislation necessary and I explained that the main principles on which the Bill had been drawn up were—(1) that the Government should have power, by the agency of its officers, to enter upon and inspect all private irrigation works which overlie any railway within the presidency, and to call on the owner of any such work to execute all repairs and improvements which might be deemed essential to the security of such railway; (2) that, in the event of the owner of such irrigation work failing to execute such repairs or improvements, or in the event of emergency, the Government should have power to execute the same by the agency of its own officers; (3) that, after the execution of such repairs or

improvements, the Government should have power to recover from the owner of the irrigation work the cost or a portion thereof, but that the sum to be so recovered should on no account exceed the amount which the owner, in the exercise of due and proper care as a land-holder, would have expended upon the maintenance of the work in question. I remarked that, while the Bill provided for the main object in view,—that of securing that all private irrigation works which lie above a railway shall be placed and maintained in a condition of proper efficiency,—it in no way increased the liability of the proprietors in respect of such works, adding that the fact that an important and extremely valuable line of communication had been constructed beneath a private tank did not constitute a valid or just reason for placing upon the owner of such tank any additional responsibility in respect of its maintenance, and that this Bill was not intended to place upon such owner any responsibility which he has not hitherto legally borne. Since then, this Bill has received very careful consideration at the hands of the Select Committee, and, in now moving that their report be taken into consideration, it does not seem necessary to add anything thereto, except perhaps to explain that, in every modification and addition made by them, the Committee have been influenced by the desire to strengthen the interests of private proprietors so far as was compatible with the paramount interests of the public."

He then moved that the Bill, as amended by the Committee, be taken into consideration and passed into law.

The motion was put and agreed to, and the Bill was considered and, no discussion arising, passed accordingly.

LOCAL AUTHORITIES LOAN BILL.

The Hon'ble MR. SULLIVAN, in introducing a Bill to empower local authorities to guarantee interest on capital expended on certain purposes, said:

" YOUR EXCELLENCY,—The measure which I ask leave to introduce is intended to remove an obstacle from the path of those who are able and willing to help themselves, and it will therefore, I am sure, command the attention and support of the Council.

" One of the purposes to which the funds of Local Boards can by law be applied is the construction of communications which include railways. But, although a District Board is legally competent to provide the capital for the construction of public works, it has not heretofore had authority to guarantee, on the security of its funds, the payment of interest on capital advanced for the purpose from outside. This was due to certain restrictions which found place in the Imperial Act XI of 1879 and which, as set forth in the statement of objects and reasons, have been removed by the passing of Act XV of 1885 by the Council of the Governor-General. To supplement this it now only remains for this Council by special enactment to confer on local authorities, as by law defined, power to contract with any person or corporate body for the execution of works, to the cost of which local funds can legally be applied, and to guarantee the payment of interest on the capital expended thereon by a charge on such funds. For this the Bill now introduced, it is thought, sufficiently provides. The necessity for such a measure became apparent when the Local Fund Board of Tanjore resolved on the expediency of connecting the town of Mayavaram with the port of Mutupet by a line of light railway. The Board showed itself to be thoroughly in earnest by agreeing to the local cess being raised from nine pies to one anna, the difference being set aside to provide the necessary funds for railway extension, the intention being to guarantee the interest on the capital required. It was then found that this pledge could not be given in the existing state of the law, and the measure now introduced will complete the legislation required to give the Tanjore and all other Local Boards the necessary powers. This movement of the Tanjore Local Board is very gratifying, evidencing, as it does, that the advantages of railway communication are not only appreciated by the people, but appreciated to such a degree that they are willing to tax themselves in order to secure them. If the movement develop, as I think it must do, it will go far to solve the problem of how the advantages of the great railway systems of India are to be brought within reach of the people who are now isolated therefrom, and in the not distant future we may reasonably expect to see a net-work of local lines connecting at least every taluk with the great centres of trade and population. Hitherto we have sat patiently awaiting an Avatar in the form of what is called private enterprise to do this for us, but private enterprise, in this country at least, dislikes the element of risk and cannot be got to move unless a dividend is assured. The

action of the Tanjore Board secures this, and therefore we may confidently look to the Mayavaram-Mutupet line being an accomplished fact ere very long. It will, I trust, be the pioneer of many other local lines, the construction of which will be met from similar resources. I now move that the Bill to empower local authorities to guarantee interest on capital expended on certain purposes be referred for report to a Select Committee consisting of the following members, viz.:—

The Hon'ble Mr. Master,
The Hon'ble Mr. Boyson,
The Hon'ble Mr. Barlow,
The Hon'ble Mir Humayun Jah Bahadur, c.i.e.,
The Hon'ble the Advocate-General, and
The Mover."

The motion, which was seconded by the Hon'ble Colonel Shaw-Stewart, was put and carried.

MALABAR COMPENSATION FOR TENANTS' IMPROVEMENTS BILL.

The Hon'ble S. Subrahmanya Aiyar, in introducing a Bill to secure to the tenants in the Malabar District the market-value of their improvements, said:

"Your Excellency,—In introducing the Bill to amend and declare the law relating to compensation for improvements by tenants in the Malabar District, I do not think I need detain the Council with any lengthy observations. The statement of objects and reasons that has been published with the Bill would, I hope, have placed the matter in a sufficiently clear light, and it is scarcely necessary for me to repeat here all the reasons that weighed with the Committee appointed by the Government last year to recommend the immediate introduction of this Bill. I may, however, state that among the gentlemen consulted by Government on the subject there is a consensus of opinion as to the propriety of passing a law like the present Bill without further delay. Though I must admit that the subject of Malabar Land Laws is one beset with many difficulties, I should not omit to mention that it is not necessary for the purposes of this Bill to enter into the complicated questions affecting the relations between landlord and tenant and to consider and trace the disturbances in Malabar, which have of late been engaging public attention, to their legitimate cause, nor is it necessary to determine whether the Moplah outrages were the outcome of the strained relations between Malabar land-holders and their Moplah tenants, or were purely the result of the fanaticism of the latter; for, outside these questions, there are circumstances in the existing relations between jenmis and their tenants which render reconsideration and re-adjustment of those relations in certain important particulars highly necessary. This view is fully shared in by many experienced officers who have had ample opportunities of studying the question in all its bearings and forming correct opinions thereon. It is a noteworthy circumstance that, while there is much divergence of opinion upon several matters connected with Malabar land tenures, all are agreed in thinking that the tenant's right to compensation for improvements made by him is very insufficiently and inadequately secured. The practice obtaining in Malabar of calculating compensation for improvements by tenants at rates said to be customary has been rightly condemned on all hands as very unsatisfactory and ill-suited to secure to the tenant the full market-value of his improvements. According to Mr. Logan, one result of this has been that large tracts of land, which would otherwise have been brought under cultivation, lie waste and unutilized. It is certainly unreasonable to expect that tenants would reclaim waste lands and improve them at considerable sacrifice of labor and capital if they are to be turned out when there is a prospect of a good harvest with the small pittance that is now allowed them as compensation calculated at rates fixed generations ago when the products of land were excessively cheap. One cannot exaggerate the importance, from an economical point of view, of encouraging improvements by tenants, especially in a district possessing such natural advantages as Malabar. As has been well observed by the Hon'ble Mr. Quinton in the Viceroy's Council, there are few things in this country more necessary for the good of the country generally, and the agricultural classes in particular, than that landlords and tenants should have the strongest inducements to effect improvements in the land held by them as a protection against famine and as means of promoting increased production of food to meet the growing demands of a rapidly-increasing population, and all obstacles

which obstruct the carrying out of improvements should be removed so far as this can justly be done. This is what the present Bill aims at accomplishing, and it merely enacts in clear terms the rights of tenants to compensation for improvements effected by them on the basis of the custom of the country. The principal change that will be introduced by the Bill will be that the courts will no longer be required to adhere to stereotyped old rates at which compensation was hitherto calculated. Apart from the objection that, since these rates were fixed the cost of production and labor has immensely increased, the want of uniformity in the rates prevailing in the various parts of the district is so great as to justify one in concluding that the rates rest upon no intelligible principle. As an instance, I may say the rates of compensation per cocoanut tree varies from ten pies in one place to as much as Rupees 14 in another. As has been explained in the statement of objects and reasons, the Committee appointed by Government in September last, after careful consideration, have thought it expedient to recommend the immediate passing of this Bill, and I entirely agree with them in thinking that this Bill, if passed, will go some way towards ameliorating the condition of the tenants. Whether it will operate as a check on improper evictions and to what extent it is perhaps too early to predict. But, whatever may be the other effects of this Bill, I feel confident that it will greatly tend to place the question of valuing compensation on a rational footing and will offer every inducement to the tenant to improve his holding by affording him facilities in obtaining the full market-value of his improvements. It is only proper to add that my only claim to being entrusted with the charge of this Bill is the fact of my being a member of the Committee appointed by Government in September last. With these remarks, I beg to move that the Bill be referred for report to a Select Committee to consist of—

The Honorable Mr. Master,
The Honorable The Advocate-General,
The Honorable T. Rama Rao, and
The Mover.

The motion, which was seconded by the Honorable Mr. Sullivan, was put and carried.

BILL TO AMEND THE CITY OF MADRAS MUNICIPAL ACT I OF 1884.

The Hon'ble Mr. Barlow moved for leave to introduce a Bill to amend sections 13, 271, 272, and 323 of the City of Madras Municipal Act I of 1884 and said:

"Your Excellency,—The rapid spread of the class of villages termed parcherries in most of the suburbs of Madras—regardless of situation, sanitation, or police control—has of late attracted the serious attention of the local authorities. The Madras Municipal Act authorizes the President to intervene and regulate or prohibit the erection of huts only when a cluster of six or more are situated on the property of one individual, but this law is practically powerless where several small landholders combine to build five huts each on their adjacent holdings. The amendments I now move for leave to propose will remedy this defect and further rectify certain verbal errors and omissions in the other sections named in my notice."

The Hon'ble Mir Humayun Jah Bahadur seconded the motion.

The motion was put and carried, and leave was then granted to introduce the Bill.

The Council then adjourned *sine die*.
